

COMPARISON TEST PUMPS

- **Quick and easy to use**
- **Liquid, air and vacuum models available**
- **BSP quick handtight sealing adaptors**
NPT adaptors on request
- **Pressures up to 1000 bar**

These test pumps are used for checking pressure measuring instruments against master test gauges. They are available as portable instrument or they can be bench mounted.

They are supplied with BSP quick hand-tight sealing gauge adaptors.

LIQUID - Models T1200 and T1250

*Tested with water, and suitable for use with:
water, mineral/vegetable oil, alcohol.*

*Fitted with a reservoir and valve, pressure is quickly
generated with the ram screw.*

The T1250 is on request available up to 1000 bar.

AIR - Model T4100

*Pressure is generated with the
sensitive handpump and is vented
with a fine control needle valve.*

VACUUM - Model T4200

*Vacuum is generated quickly and easily with the
handpump and vented with a fine control needle valve.*

Technical Specifications

Supply includes:

1/8", 1/4", 3/8", 1/2" BSP adaptors.

Pressure gauges

The supply of the Comparison Test Pump does not include any pressure gauges. These have to be ordered separately. A complete range of test pressure gauges is available from Tradinco. Please contact us for further details.

Model	Range
T1200	350 bar
T1250 T1250/S5053	700 bar 1000 bar (optional)
T4100	20 bar
T4200	90% vacuum
