

Resistance box

Temperature reference

This specially designed resistance box accurately simulates a PT100 platinum resistance thermometer according to DIN IEC 751.

The setting is made directly at °C so that there is no need to use conversion tables.

Features:

- temperature range: -70 - + 850°C
- accuracy : $\pm 0.05\%$
- resolution: 0.1°C; 1°C
- Special designs available.
