

TRAQC 3 Dry-block calibrator

A rugged precision field dry-block temperature calibrator.

- Designed and manufactured by Tradinco
- ambient + 5 °C to 375 °C
- small, light weight
- rugged
- accurate
- fast
- switch test
- AutoCal compatible
- Auto adjusting software

TRAQC3 datasheet 390.13 Kb

Tradinco developed this calibrator for use in field applications where accuracy in combination with a rugged design, ease of use and speed is required.

Various fixed block option designs are possible, depending on customers requirements.

fully automatic calibration possible in conjunction with Tradinco Autocal® calibration software.
