

## 2195C Manual Pressure controller

- Designed and manufactured by Tradinco
- Pneumatic pressure control from &ndash;1 to 350 barg,
- Eurocassette style, for workbench integration
- Dedicated controllers to be used with 2195P series
- Easy to use
- Excellent pneumatic control for calibration purposes
- Various custom made configurations possible

Data sheet

Tradinco Instruments has developed a new range of pneumatic pressure control modules, the 2195C series.

These series of manual pressure controllers are the ideal instruments for controlling any required test series is an eurocassette instrument (36TE/3HE), and suitable to be integrated into the most common types of workbenches.

The many configurations, enables the user to select the maximum functionality and ease of use for all applications.

The 2195C series complements the 2195P Precision Pressure Indicators, resulting in the excellent calibration solutions.
